

NEW!

MD Series Harnesses PivotFit™ • Stayflex™ • Trimline

Same great harnesses, now with MD (multi-directional) Pull Straps. No need to choose in advance between Front-Pull and Rear-Pull — the versatile MD Pull Straps work both ways! Easily set up and change pull styles on the spot to adapt to individual user needs. Simplified ordering, and fewer compromises at the time of fitting.

Attach straps to fastener on harness shoulder pad. Simply reverse direction of strap assembly to switch between Front and Rear-Pull.

Front-Pull Configuration

Rear-Pull Configuration

New sewn-in D-ring looks sharp and always hold its position (patent pending).

New two-piece Flat-Mounts™ make it easier to adjust strap length after installation, and are now sized to fit M6 screws.

Updated end-fittings, too!

Our MD Series harnesses come with four of our new, high-strength plastic end-fittings. Choose from plastic Flat-Mounts™ or Cinch-Mounts™. Grommet Straps available separately.

End-fittings also available separately in 2-packs

MD Series Harness Styles & Part Numbers

PivotFit™ Shoulder Harness

Our advanced-design shoulder harness distributes pressure across a 25% greater surface area than a traditional H-style. Body-contouring pads provide optimal support and comfort. Low-placed sternum strap reduces risk of strangulation and improves adjustability. The Standard version is great for spinal curvature or trunk rotation; the Dynamic allows more torso movement.

Stayflex™ Chest Support

Provides wheelchair users firm trunk control without sacrificing comfortable shoulder movement. Patented, dual stretch zone construction eliminates upwards shift at the neckline when leaning forward, minimizing strangulation risk. Carefully selected materials optimally balance stretch and resistance, and quick-release swivel buckles allow easy removal.
